

BATTLESHIP CLONE

Title: "Warships"

Description:

Warships is a player-versus-computer game where the player must sink their opponent's battleships before their own ships are sunk!

ASSETS:

- Water Tiles
- Player Warships (Green for Active and Grey for Destroyed variants)
- Enemy Warships (Red for Active and Grey for Destroyed variants)

Gameplay:

- There is a 10x10 board where the player must place their battleships. The enemy has a 10x10 board where they place their own battleships. Every turn, the player must bomb a location on the board, and if there is a battleship there, it is sunk. Once the player has taken their turn, the enemy will bomb a random location on the board and sink one of your ships if they hit one.
- Each warship has only one health; attack a warship, and is Destroyed.

RollOuts:

- add varying board sizes for difficulty (8x8, 10x10, etc.)
